RE: Order Requiring Measuring Devices and Controlling Works in Water District 11  
Dean Kunz pump

Dear Cindy and Tim,

PacifiCorp is in receipt of your letter dated February 20, 2008 requiring measuring devices and controlling works in Water District 11. Specifically, PacifiCorp has an interest in this since the Dean Kunz pump location is part of this requirement. The letter indicates that a written plan be provided by March 21, 2008 describing the type of measuring device and/or controlling works will be installed.

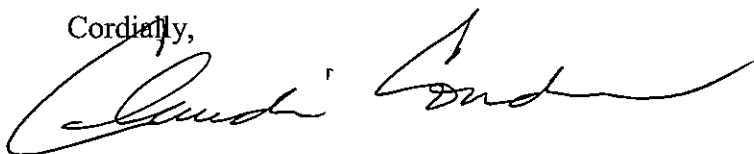

PacifiCorp (formerly Utah Power & Light Company) acquired the water right from Dean Kunz in 1916. While I have not been able to trace the entire history, it has become questionable as to whether or not a pump or a diversion actually exists at this site.

Due to the current uncertainty mentioned and the current conditions on the ground, PacifiCorp is requesting an extension of time from the March 21, 2008 deadline imposed in which to make a final determination as to the existence of a pump or diversion. The extension requested is for June 30, 2008 in which to provide the required written plan to the department. PacifiCorp agrees that no water will be diverted from this site prior to a measuring device being installed (if it is determined that there is in fact a physical diversion at the location).

PacifiCorp will make every effort to make a determination prior to the requested extension date and will notify the department as soon as the determination is made. If the diversion does in fact exist, a written plan will be provided to the department and, again, PacifiCorp agrees that no water will be diverted prior to a device or control structure is in place.

Thank you for your consideration in this matter. I will anticipate a written response at your earliest convenience. If you have any questions, please contact me at (801)220-2252 or via e-mail at [Claudia.Conder@PacifiCorp.com](mailto:Claudia.Conder@PacifiCorp.com).

Cordially,

A handwritten signature in black ink, appearing to read 'Claudia Conder', with a long horizontal flourish extending to the right.
